Multi-National Initiatives: Lessons Learned and Beyond

Mr. Alan Eckersley
Joint Lessons Learned Policy Branch
J-7, Joint Education and Doctrine Division

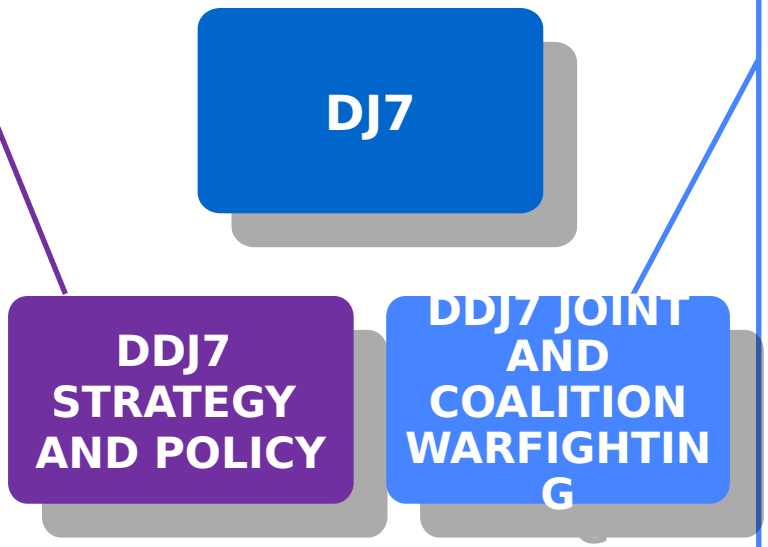
Agenda

- **Purpose: To provide an overview of current and future initiatives regarding information sharing in the Chairman's Joint Lesson Learned Program (JLLP)**
- **Overview of the JLLP: Roles and Responsibilities—Expanding venues**
- **Current: Joint Lessons Learned Information System (JLLIS) Five-Eyes (FVEY)**
- **On-going: Study examining the information sharing lifecycle with emphasis on Joint Staff policies for lessons learned sharing**
- **A Success Case Study: Navy's SeaPort**
- **Future: Future Mission Network**

The Chairman's Joint Lessons Learned Program (JLLP)

DDJ7 S&P Strategy and Policy:

- Develops joint lessons learned policy and guidance
- Joint Lessons Learned Information System (JLLIS) Program Manager
- Administers the LL General Officer Steering Committee (LL GOSC)
- Conducts validation, integration, and evaluation for joint lessons learned



DDJ7 JCW: Joint and Coalition Operational Analysis (JCOA)

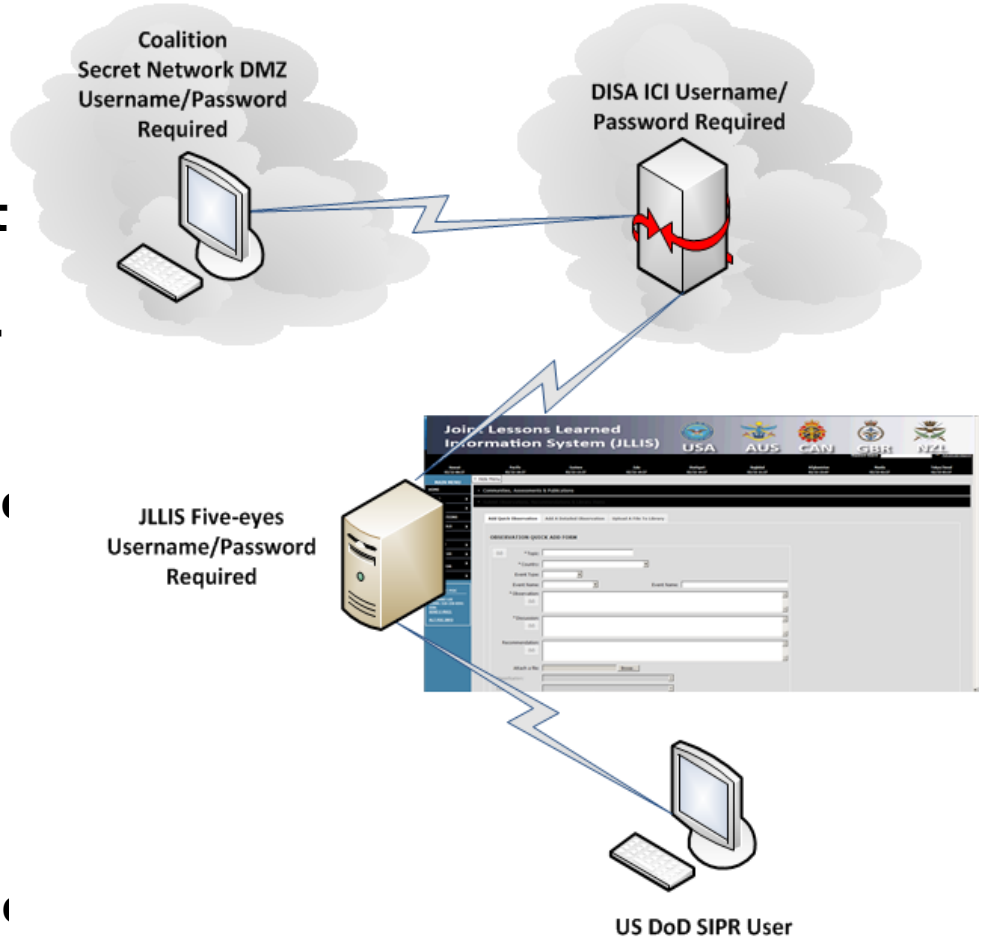
- As directed, deploys world wide and collects, analyzes, aggregates, and disseminates joint lessons & best practices across the full spectrum of military operations in order to enhance joint capabilities
- Provides active lessons and analytical support
- Creates multi-media products to

JLLIS FVEY

- **The Joint Staff J7 through collaboration with PACOM, Defense Information Systems Agency (DISA) and ACGU partners established a service using the Improved Connectivit Initiative (ICI) that provides access to ACGU JLLIS to the "4-Eyes" nations.**

- **JLLIS ACGU was deployed on th SIPRNET in August 2010 and expanded to include New Zealand in November 2010.**

- **This environment mirrors the DOD JLLIS SIPR application and provides FVEY partners with th ability to capture and share observations, issues, best practices, and lessons learned.**



JLLIS FVEY Environment

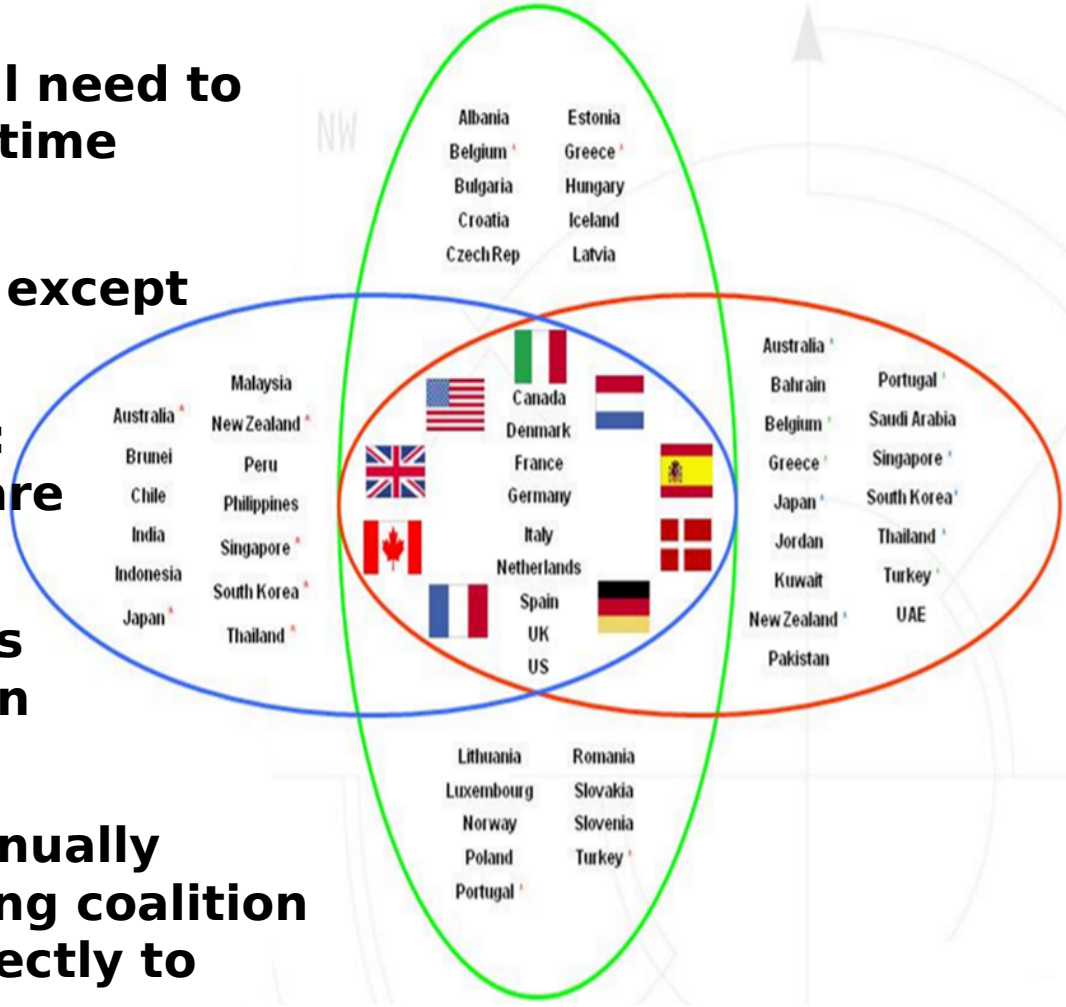
- **Support collection efforts during Joint/Combined operations and exercises**
- **Facilitate information sharing between and across security boundaries**
- **Enable real time collaboration between multi-national counterparts**
- **Support multiple communities of interest (releasability constraints)**
- **Current Number of Users: 182**

JLLIS Information Sharing Study

- A six month study to examine four primary areas:
  - Identify legal challenges in establishing a coalition version of JLLIS
  - Identify the options for software sharing
  - Identify the hardware/software licensing requirements
  - Identify possible network structure
- Primary emphasis is on policies and procedures
- “Cookbook” POA&M approach allowing for step-by-step implementation

A Unique Approach: SeaPo

- **Born out of an operational need to centralize and share maritime information**
- **Works across all domains except unclassified**
- **“Coalition of the Willing”: Each user is willing to share information with all users**
- **Foreign disclosure policies are permissive rather than restrictive**
- **Release policies are continually updated to reflect changing coalition members and are tied directly to system architecture to ensure**



People, Process and Technology Working Together

Future Mission Network (FM

- **FMN is neither "future" or a "network"; it is a framework for guiding the evolution / enhancement of current capabilities**
  - **Military Problem – *"A command and control environment does not exist for operations on a mission secret or unclassified security level for mission partner operations"***
  - **Operational Gap – *"Unity of effort and "speed of command" for delivering mission partnered operational effects"***
- **Leverage & build on Afghanistan Mission Network (AMN) experience**
- **Initial Capabilities Document (ICD), Concept of Operations (CONOPS), Tactics**

Governance & Policy produced

Key Core Capabilities:

- **Chat**
- **Voice Over IP (VOIP)**
- **E-mail (with attachments)**
- **Global Address List Sharing**
- **Web Browsing**
- **Video Tele-Conferencing (VTC)**

Removes constraints of conducting operations solely on SIPRNET

Way Ahead

- **Continue further expansion of the lessons learned program into multi-national venues to include NATO's JALLC**
- **Find innovative solutions addressing releasability issues**
- **Work through existing venues to strengthen outreach to coalition partners**
- **Gather feedback on FVEY JLLIS and ICI from a ACGU perspective.**
